

Entrata Setup Guidelines

Properties can complete the setup through the following steps:

1. Configure Property
2. Create Interface User & Provide Credentials
3. Provide API Access

1. Configure Property:

The web services / endpoints that need to be enabled are

- getProperties
- getLeases
- getCustomers
- getLeaseArTransactions
- getArCodes
- getPropertyunits

2. Create Interface User & Provide Credentials:

Create an Account and the information below should be completed and sent over to the Esusu team via email to rent-operations@esusu.org:

Entrata URL (Example: <code>https://apis.entrata.com/ext/orgs/your companycode</code>)	
----------------------------------------------------------------------------------------------------------	--

3. Provide API Access

- Login to your Entrata Portal
- Navigate to Apps > API Access
- Create and add newly created Esusu Interface User
